

Hangman

20 September 2022 19:21

```
Enter your guess: s
sorry, this was wrong!
```

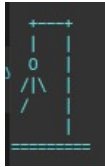

```
Enter your guess: A
Great, you got i right!
```

-> Cant enter more than one letter at one because of ReadKey()

```
Enter your guess: !
sorry, this was wrong!
```

```
Enter your guess: l
sorry, this was wrong!
```

-> For invalid values it just puts out wrong guess, the user should be smart enought to find the letter keys on his keyboard in oder to win xD

-> This is the gallow building up, view the gallow.txt to see all of them

```
Sorry you lost!
```

-> When you lose you have the ability to restart the game without reopening of course
